**DECLARATION UNDER 37 C.F.R. § 1.132**

Sir:

**We, Steve Burns, John G. Bellemore, Michael Gardner, and Vicki Shimizu,**

declare as follows:

1. At the time the claimed subject matter of the present application was conceived, we were employees of Oracle Corporation, which is the owner of Oracle International Corporation, which is the assignee of the present application. We believe that Steve Burns held the job title of Senior Development Manager, John G. Bellemore held the job title of Software Development Director, and Michael Gardner and Vicki Shimizu held the title of Principal Software Developer. In these capacities, we have personal knowledge of the facts and circumstances stated herein, except those statements which are made upon information and belief as set forth herein.

2. We believe that the Oracle White Paper titled "Oracle9iAS Portal Release 2 (Version 9.0.2): New Features" (hereinafter referred to as the "Oracle White Paper") was compiled and authored by Gail Wingate, who at the time held the position of product manager

responsible among other things for publishing to customers details of new features in upcoming product releases.

3. We declare that to the extent any portions of the Oracle White Paper, when taken together, disclose the subject matter of independent Claims 1 and 18, these portions describe subject matter which is our own work and for which we are the sole inventors. Further, we believe that these portions are based on designs, specifications, and presentations that were prepared by us and that were available to Gail Wingate for input into the Oracle White Paper.

4. We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further, that the statements are made with the knowledge that willful false statements in the like so made are punishable by a fine or imprisonment or both, under Section 101, Title 18 of the United States Code and that such willful and false statements may jeopardize the validity of the present application or any patent issued there under.
